

# HF RX Pinout

## Thank you for purchasing the HF RX converter board for DDS-VFO!

Below you will find the connection points and a picture of the actual board.

If you have any questions, please contact Toby N5SIM [toby@troyradio.net](mailto:toby@troyradio.net)

**Note:** Use a good quality coax such as RG-174 or equivalent from Clk-2 of the Si5351 to the HF RX.

Some kits come with surface mount coils on the trace side of the board. Be careful not to break them off.
